NIVASH MUKIL

+91 8754972234 | nivash1912004@gmail.com | Github | Linkedin

Aspiring Python Developer seeking an entry-level position to leverage programming expertise in Python, SQL, and Django. Eager to apply my skills and work in a dynamic environment while contributing to impactful projects and building efficient, user-friendly applications.

SKILLS

- **Languages :** Python, SQL (MySQL, Oracle SQL) , JavaScript, HTML5, CSS3
- **Frameworks :** Django, FastAPI, REST API
- **Developer Tools :** VS Code, PyCharm, Excel, Power BI
- **Libraries:** Pandas, NumPy, Matplotlib, Seaborn, OpenCV, Scikit-learn

PROJECTS

Food Web Application | Python, Django, Html5, Css3, Bootstrap5 **Jan 2026**

- Developed a responsive Django-based **Food Web Application** UI using HTML, CSS, and **Django templates**, implementing login, logout, home, food listing, and user profile pages.
- Built reusable and responsive page layouts using **Bootstrap UI**, **Django template inheritance** , and static file handling , enabling admin-managed food images and dynamic listings with consistent styling and faster UI updates .
- Implemented a **Top Rated Foods section** to highlight frequently ordered items , helping users quickly identify popular choices and **make faster ordering decisions .**

Face Recognition System | Python, OpenCV, NumPy, LBPH **Feb 2026**

- Developed a real-time **Face Recognition System** using **Python**, **OpenCV**, **Haar Cascade**, and the **LBPH** algorithm, implementing webcam-based face detection and recognition for automated identity verification.
- Built a custom facial image dataset by capturing and pre-processing webcam images, including grayscale conversion and image resizing, to train an accurate **LBPH Face Recognizer** model.
- Implemented confidence-based face recognition with automatic **Unknown person detection** and image capture, demonstrating practical applications of **Computer Vision** and **Machine Learning.**

EDUCATION

Madurai Kamaraj University College **July 2021 - May 2024**
Bachelor of Science (B.Sc.) in Computer Science; CGPA:6.3

Balamandiram Higher Secondary School **July 2019 – June 2021**
Computer Science; Scored:**81%**

TRAINING /COURSEWORK

Data Analysis with Python Full Stack Course **July 2025- Present**
Pyspiders ,Bangalore

- Learning data analysis, cleaning, and visualization using Pandas, NumPy, and Matplotlib.
- Studying statistical concepts, hypothesis testing, and exploratory data analysis (EDA).
- Applied basic machine learning techniques such as regression and classification to support data analysis , resulting in improved data-driven insights using Scikit-learn on sample datasets.

ADDITIONAL INFORMATION

- **Soft Skills:** Time management, Teamwork, Leadership, Quick learner, Communication skills, Adaptability
- **Areas of Interest:** Frontend Design, Full Stack Development, SQL Server, Database Management
- **Languages:** English, Tamil
